Affiliations

Two or more entities, living or not, that are in association, have something in common, recognized or not.

A co - winkidink

Grid

Structure - two dimensional

Each file (μBWV) represents the output of a mental ^project of passing interest that became an obsession that resulted in a write - up that may include a not - so - long dissertation, snarky analysis, song, etc.

To ultimately keep the duration of the suffering to a minimum, any research is mostly limited to Wikipedia and a newspaper or two.

The newspapers generally spark the recognition of a long buried obsession where, through osmosis, related information seeped in and metastasized, like a cancerous lump.

Eventually the lumps got *two dimensionally* organized.

Obsessions

There are 50+ *known* (diagnosed - ^projects (cancers) developing (metastasizing) in parallel on any given day, where a few get dropped or merged (go into remission) but most likely they uncontrollably split and spawn (see μDONT and μOPSEC) becoming systemic (psychologically lethal).

The ^projects, and the related efforts to fully develop each ^project requires the following:

- writing and editing unstructured information
 - ✓ the file μBWV
- gathering and merging structured information
 - ✓ the file μAffiliation - Grid

- gathering atomic information (not nuclear)
 - ✓ standalone, singular
 - ✓ digital blobs
 - ✓ image, audio, video
 - ✓ computer programs

- one - off and entire systems
- keeping the business running

Audiences

After a dozen or so obsessions came and went a pattern emerged where ^projects fell into several groups or realms forming a fairly stable list of *categorical* target audiences.

- POL - Political Afficionados

Several ^projects may catch the eye of two or categorical target audiences. And, thus the **μAffiliation** was born and retro - applied to existing ^projects.

Meta-^project

μAffiliation was the first, but certainly not the last, meta-^project - a ^project that solves a problem or more improves the efficiency of developing ^projects.

Meta-meta-^project

And, **μAffiliation - Grid** is the first (and I fear, not the last - meta-meta-^project).

Quantitatively and qualitatively a **timeline of grids** of ^projects is unfortunately foreseeable (a meta-meta-meta-^project).

After that, it just gets silly.

Silly or not, thinking *about* the *meta* became a ^project with its own philosophical write - up with graphs and comics - μDISC). As such, a footnote to a ^project about ^projects concerning topics of interest.

Meta-Obsessions

Extended attention is - subconsciously - paid to a select few ^projects that developed into meta-obsessions such that the ^project was split into its own self - referential *series* of sub-projects with an imagined *targeted* audience - though **not** *categorical* - a much more obsessive or hobbyist audience, like everyone still reading here and now, wherever and whenever you be).

Targeting

The *targeting* either takes the form of *fandom* or a *bulls - eye*. The *bulls - eye* ^projects are obviously more fun and snarky - see μDONT - initially targeting a generalize Trumpist audience then spawning into 25 (twenty - five) *actionable* ^sub-projects).

It is hoped that a meta-obsession will run its course - like a fever at the peak of a cold - and dozens of other deserving ^projects can be taken off the back burner.

That hasn't ever happened, but one can hope.

Much like the rest of the citizen voters in America at this time, Good luck with that... Maybe after mid - term elections and before 2024 campaigning begins - 1 week?

Unless Puutan nukes us all to glass.

Structure is Good

Structure of any kind often reveals patterns that in this case results in more ^projects.

Not needed, but *that* horse is out of *that* barn already.

The ever popular *other* or *misc.* column - header (see next section) is begging to be added but encouraging *random* projects is the only outcome and that is like asking an addict if they want to go to a party...

Not Good

Bad

The ^project grid

The observant - non - denominationally - will have noted single character non - alpha - numeric prefixes included with a few words.

Also some ALL caps.

The visually vs auditorily oriented - may appreciate the symbolic clues regarding the topic type.

Remember when *that* consumed every waking thought!

Memorable and idiosyncratic codes and titles.

APPENDICES

In order to keep this file - ^project - to a manageable size, only the meta-obsessive ^project identifying codes, and brief titles, are listed but not the 5 - 50 sub - ^projects associated with each, plus 1 or more new ones/day.

OBSESSIONS WITH A SERIES OF ^PROJECTS

μPERS	Personhood the first ^project – spawned, <i>cases</i> spawned one per <i>State</i> , next one per <i>Country</i>
μOPSEC	Operational Security , surprisingly the 2 nd ^project, a 6 - 8 ^project <i>series</i> - stay safe out there
μDONT	Don't The Original <i>series</i> , not surprising where living in a cave is not an option, 25 sub-projects and counting
μPREP	Preppers and FEMA needers, dozens sub-projects but now with FL, CU, PR, JP, CA, KY, CH disasters - very timely
μWORLD	51% World Domination , Politics leaning toward <i>autocracy</i> soon, to be a project and a <i>series</i> . 100% is idiotic
μPAYME	PayMe , Finance, a spin-off from Preppers , another soon to be project – <i>series</i> . Lots of <i>technology</i> and <i>technique</i>
μRANON	(secret) , a <i>pièce de résistance</i> , the final word on μWORLD, an incoherent rant; a little red book for the new Millennium

Just like on X - mas eve - for those who participate

You may shake the box but you cannot open it until the morning.
